## PROFILE

A university graduate, I am currently studying for a masters degree — MSc Computer Science. I am looking for a career in software development.

After graduating with a BA (Hons) in Politics and a Certificate with Merit in TEFL, I taught English, full-time, at state primary and secondary schools and a language centre in Vietnam.

---

MSc project — a web app to teach Russian cases

**Pianot.es**

2020

Interactive web app — learn and practice music notation

I have experience with Java, JavaScript, Python, MySQL, PHP, HTML & CSS.

---

## INTERESTS

I have an enthusiasm for languages, having learnt conversational Dutch while studying in the Netherlands, and a little Vietnamese while living there. I took my first Russian classes at The Hague University in 2015, and I continue to study in my free time.

Travelling extensively during university vacations, I have enjoyed meeting new people and experiencing unfamiliar cultures. I have travelled throughout Europe and Asia, including to unusual destinations such as North Korea and the unrecognised state of Transnistria.

Health and fitness being important to me, I am a keen road cyclist and a runner, and ran my first marathon in Athens in 2016. In 2019 I completed a 50km ultramarathon. I am a member of the Swansea University Road Team (cycling).

I also enjoy playing the piano.
